MESSAGE:

Brian,

I am responding to Selkirk's request and have added their pipe as an alternative to the Dura-Vent system currently listed in our manuals. If you have any questions or concerns please call me or e-mail me.

Sincerely,

Larry McBee

Division Manager

INSTALLATION INSTRUCTION APPENDIX FOR COUNTRY FLAME GAS TECHNOLOGIES MODELS:

CHATEAU-XL, BAYVUE DV & FS-2000 DV

Selkirk Model Direct-Temp™ direct venting system has now been added as an approved venting option by our safety certification organization, Intertek Testing Services / Warnock Hersey (ITS/WH), for the above referenced direct vent gas appliances.

When using Selkirk Direct-Temp™ as an alternative venting system, follow the same system layout, clearance to combustibles and other guidelines as currently included in our main installation instructions for the above referenced appliances. The Selkirk Direct-Temp™ installation instructions are included with all Selkirk Direct-Temp™ terminations and provide clarification on how certain parts / pieces are assembled, but do not give specifics on system layout options. Follow both sets of instructions.

Attached is a cross-reference chart for the Selkirk Direct-Temp™ system versus the system currently referenced in our instructions.

If any questions arise with respect to correlating parts or issues associated with the Selkirk Direct-Temp™ system, contact Selkirk Technical Support at 800-848-2149, ext. 203 or our Technical Support at Country Flame Gas Technologies at 417-859-0990.

Effective date: 05/10/04
